

PRODUCT DATA SHEET

OIL STABILIZER

HIGH MILEAGE TREATMENT
TRAITEMENT KILOMÉTRIQUE ÉLEVÉ
ENGINE SUPPLEMENT
SUPPLÉMENT MOTEUR

Rislone® Hy-per Lube® Engine Supplement / Oil Stabilizer is a 100% premium base oil and petroleum-extracted high kilometre / mileage treatment additive blend that works with all motor oils including conventional, high kilometre and synthetic formulas to make older, high-kilometre and high-performance engines run better and last longer. Also great to use in gears boxes, differentials and axles. Works with all lubricants including petroleum & synthetic engine oil, ATF and gear oil.

Use in Gasoline & Diesel Cars, Trucks, SUV's, RV's, Semis & Tractors for Automotive, Industrial, Construction, Heavy Duty and Racing.

Heavy duty protection for all driving demands. Supercharges oil performance.

Turns petroleum and synthetic oils into a hyper-performance lubricant.

- **Extends Engine Life**
- **Eliminates Dry Starts**
- **Prevents Thermal Breakdown**
- **Reduces Friction & Wear**
- **Quiets Noise**
- **Increases Oil Film Strength**

DIRECTIONS:

For best high kilometre and older engine protection, add to your favorite brand of oil anytime, at or between oil changes.

Gasoline / Diesel Engines: (Cars & Light Trucks)

Add entire bottle to engine crankcase.

Other Applications: 4-stroke marine & motorcycle, ATV (including-wet clutch), small engines (lawn mower type), agricultural, industrial, differentials, gear boxes and racing engines— Add 100 mL for every litre of capacity.

Note—One bottle treats 3.5 to 7.5 litres of oil. For severely worn components, double dosage.

Assembly Lube— 100% Engine Oil Supplement

Don't Just Stabilize Your Oil... Improve It 5 Ways with Rislone Hy-per Lube

1. Increases Film Strength:

Over 75% of internal wear occurs during the first few seconds of engine startup. Rislone Hy-per Lube Engine Oil Supplement leaves a protective film that will not run off on all internal parts including cylinders and gears, providing complete protection against start-up wear.

2. Lowers Temperature:

All lubricants can foam. Foaming restricts the oil's ability to dissipate heat which increases operating temperature leading to premature wear. Rislone Hy-per Lube's anti-foam capability reduces foam, helps extend engine life, and lowers operating temperature.

3. Prevents Thermal Breakdown:

High performance additives ensure against viscosity and thermal breakdown. Rislone Hy-per Lube's 100% petroleum-based formula provides protection between oil changes and can extend oil life by up to 50%.

4. Reduces Friction:

Friction modifiers increase engine lubrication in new and old engines. Reduced friction extends engine life, provides more power and can increase fuel economy. This is a benefit for old and higher mileage engines, and will not void any warranty.

5. Quiets Noise:

Heavy duty extreme pressure additives greatly enhance oils' ability to cushion and absorb mechanical shock. In older, worn, engines Engine Supplement also increases oil pressure to reduce lifter & valve ticking, knocks and other noises.
