Power Steering Stop Whine with Leak Repair

Part #: 34604

350 mL

Power Steering Stop Whine with Leak Repair

Rislone Power Steering Stop Whine with Leak Repair contains a special blend of viscosity improvers, anti-wear friction modifiers and extreme pressure performance additives to solve most power steering problems. These additives fix hard steering, reduce friction, control temperature, stop noise & whining and repair minor leaks. Excellent to use as a preventative maintenance product. Use to top off existing fluid when low or add a bottle when changing fluid. Specifically designed for higher mileage vehicles over 100,000 km.

- Stops Fluid Leaks
- Renews Worn Rack & Pinion
- Quiets Noise
- Fixes Hard Steering
- Extends Power Steering Fluid Life
- Preventative Maintenance
- Stabilizes Power Steering Fluid
- Prolongs System Components

Compatible with ALL types of domestic and import (Honda, Toyota, and all others) power steering fluids; including petroleum, synthetic formulas and those systems which use ATF automatic transmission fluid.

DIRECTIONS FOR USE:

Add to power steering system to restore fluid level. Do not overfill. NOTE: For severely worn systems, change the power steering fluid and install complete bottle. Results will either be immediate or noticeable within a few days of driving.

DOSAGE:

One bottle will treat 1 to 3 litres of power steering fluid. For vehicles under 1 litre use ½ of the bottle.

Small Fluid Leaks – Need to Add Fluid 1 X per Month	✓
Medium Fluid Leaks – Need to Add Fluid 1 X per Week	✓
Noise – Whining, Squeals & Growling	✓
Rough / Hard Steering	✓
Worn Rack & Pinion	✓
Renews Worn Fluid	✓
