

OIL STABILIZER

HIGH MILEAGE TREATMENT
**ENGINE
SUPPLEMENT**

Rislone® Hy-per Lube® Engine Oil Supplement

Part #: 4400

16.9 FL OZ (500 mL)

Rislone® Hy-per Lube® Engine Oil Supplement is a 100% premium base oil and petroleum-extracted high mileage treatment additive blend that works with all motor oils including conventional, high mileage, and synthetic formulas to make older, high-mileage, and high-performance engines run better and last longer. Also great to use in gears boxes, differentials, and axles. Works with all lubricants including petroleum & synthetic engine oil, ATF, and gear oil.

Use in Gasoline & Diesel Cars, Trucks, SUV's, RV's, Semis, & Tractors for Automotive, Industrial, Construction, Heavy Duty, and Racing.

Heavy duty protection for all driving demands. Supercharges oil performance.

Turns petroleum and synthetic oils into a hyper-performance lubricant.

- **Extends Engine Life**
- **Eliminates Dry Starts**
- **Prevents Thermal Breakdown**
- **Reduces Friction & Wear**
- **Quiets Noise**
- **Increases Oil Film Strength**

INSTRUCTIONS:

For best high mileage and older engine protection, add to your favorite brand of oil anytime, at or between oil changes.

Gasoline / Diesel Engines (Cars & Light Trucks)

Add entire bottle to engine crankcase.

Other Applications: 4-stroke marine & motorcycle, ATV (including wet clutch), small engines (lawn mower type), agricultural, industrial, differentials, gear boxes, and racing engines – Add 3 ounces for every quart of capacity.

Note – One bottle treats 4 to 8 quarts of oil. Severely worn components, double dosage.

Assembly Lube – 100% Engine Oil Supplement

100% SATISFACTION GUARANTEE:

If you are not completely satisfied with the performance of our product, we will refund the purchase price. Visit www.rislone.com/refunds for details.

OIL STABILIZER

HIGH MILEAGE TREATMENT

SUPPLEMENT**

***Don't Just Stabilize Your Oil...
Improve It 5 Ways with Rislone Hy-per Lube***

1. Increases Film Strength:

Over 75% of internal wear occurs during the first few seconds of engine startup. Rislone Hy-per Lube Engine Oil Supplement leaves a protective film that will not run off on all internal parts including cylinders and gears, providing complete protection against start-up wear.

2. Lowers Temperature:

All lubricants can foam. Foaming restricts the oil's ability to dissipate heat which increases operating temperature leading to premature wear. Rislone Hy-per Lube's anti-foam capability reduces foam, helps extend engine life, and lowers operating temperature.

3. Prevents Thermal Breakdown:

High performance additives ensure against viscosity and thermal breakdown. Rislone Hy-per Lube's 100% petroleum-based formula provides protection between oil changes and can extend oil life by up to 50%.

4. Reduces Friction:

Friction modifiers increase engine lubrication in new and old engines. Reduced friction extends engine life, provides more power, and can increase fuel economy. This is a benefit for oil and higher mileage engines and will not void any warranty.

5. Quiets Noise:

Heavy-duty extreme pressure additives greatly enhance oils' ability to cushion and absorb mechanical shock. In older, worn engines Engine Oil Supplement also increases oil pressure to reduce lifter & valve ticking, knocks, and other noises.
